Contents of Volume 27

No. 1

H. Shirono, C. Ito and J. Koga (Japan)
Studies on subtype composition in natural leukocyte interferon preparations 1

J.G. Bald, R. Iltis, S.M. Schneider, D.V. Gokhale and P.R. Desjardins (U.S.A.)
Association of logistic and Poisson models of infection with some physical characteristics of a single component plant virus 11

L. Xu, D. Harbour and M.A. McCrae (U.K.)
The application of polymerase chain reaction to the detection of rotaviruses in faeces 29

R.P. Parry, C. Love and G.A. Robinson (U.K.)
Detection of rubella antibody using an optical immunosensor 39

D. Larzul, D. Chevrier, V. Thiers and J.-L. Guesdon (France)
An automatic modified polymerase chain reaction procedure for hepatitis B virus DNA detection 49

P. Auvinen, T. Ziegler, T. Skern, E. Kuechler, G. Stanway and T. Hyypiä (Finland, U.K.)
Identification of rhinoviruses by cDNA probes 61

E.J. Gowans, T.B. Macnaughton, L. Mickan, A.R. Jilbert and C.J. Burrell (Australia)
Use of recombinant hepatitis delta antigen in diagnostic assays for HDV antibody 69

B. Fiszon and C. Hannoun (France)
Comparison of neuramidinases of the same subtype but from different species using a new method of titration 79

N. Hirano, K. Ono, H. Takasawa, T. Murakami and S. Haga (Japan)
Replication and plaque formation of swine hemagglutinating encephalomyelitis virus (67N) in swine cell line, SK-K culture 91

V.T.K. Chow, K.M. Tham and H.U. Bernard (Singapore)
Thermus aquaticus DNA polymerase-catalysed chain reaction for the detection of human papillomaviruses 101

T.E. Toth and D. Jankura (U.S.A.)
Analysis of bovine parainfluenza-3 virus replication in bovine embryonic lung cells by indirect fluorescent antibody and hemadsorption assays (Short Communication) 113

H.A. Cubie, G.F. Winter, E.E. Leslie and J.M. Inglis (U.K.)
Rapid detection of respiratory syncytial virus antigens in nasopharyngeal secretions (Short Communication) 121

No. 2

A. Azzi, K. Zakrzewska, G. Gentilomi, M. Musiani and M. Zerbini (Italy)
Detection of B19 parvovirus infections by a dot–blot hybridization assay using a digoxigenin-labelled probe 125

R.A. Parker, D.D. Erdman and L.J. Anderson (U.S.A.)
Use of mixture models in determining laboratory criterion for identification of seropositive individuals: application to parvovirus B19 serology 135

B.P. Griffith, H.C. Isom and J.T. Lavallee (U.S.A.)
Cellular localization of cytomegalovirus nucleic acids in guinea pig salivary glands by in situ hybridization 145

Y. Umino, S. Saito, A. Fukuda, M. Hishiyama and A. Sugiura (Japan)
Improvement in potency assay of measles-mumps-rubella trivalent vaccine: interference between components and measures for its elimination 159

E. Tjøtta, O. Hungnes and B. Grinde (Norway)
An assay for quantifying infectious HIV particles 169

R.G. McFarlane, T.W. Molitor and V.N. Vakharia (U.S.A.)
The detection and differentiation of foot-and-mouth disease viruses using solid-phase nucleic acid hybridization 175

J.D. Peterson, S.D. Miller and C. Waltenbaugh (U.S.A.)
Rapid biotin-avidin method for quantitation of antiviral antibody isotypes 189

O. Yamada, T. Matsumoto, M. Nakashima, S. Hagari, T. Kamahora, H. Ueyama, Y. Kishi, H. Uemura and T. Kurimura (Japan)
A new method for extracting DNA or RNA for polymerase chain reaction 203

B. Zweygberg Wirgart, M. Landqvist, I. Hökeberg, B.-M. Eriksson, E. Olding-Stenkvist and L. Grillner (Sweden)
Early detection of cytomegalovirus in cell culture by a new monoclonal antibody, CCH2 211

R. Scholten, L.A.Th. Hilgers, S.H.M. Jeurissen and M.W. Weststrate (The Netherlands)
Detection of Marek's disease virus antigen in chickens by a novel immunoassay 221

G.G. Abbott, J.W. Safford, R.G. MacDonald, M.C. Craine and R.R. Applegren (U.S.A.)
Development of automated immunoassays for immune status screening and serodiagnosis of rubella virus infection 227

No. 3

O.A. Steele-Mortimer, H. Meier-Ewert, R. Löser and M.J. Hasmann (F.R.G.)
Flow cytometric analysis of virus-infected cells and its potential use for screening antiviral agents 241

A. Fenton, G. Entrican, J.A. Herring and P.F. Nettleton (U.K.)
An ELISA for detecting pestivirus antigen in the blood of sheep persistently infected with border disease virus 253

A.M.Y. Permeen, C.K. Sam, R. Pathmanathan, U. Prasad and H. Wolf (West Malaysia, F.R.G.)
Detection of Epstein-Barr virus DNA in nasopharyngeal carcinoma using a non-radioactive digoxigenin-labelled probe 261

P.A. Somogyi, A. Gyuris and I. Földes (Hungary)
A solid phase reverse transcriptase micro-assay for the detection of human immunodeficiency virus and other retroviruses in cell culture supernatants 269

349

C.A. Consales, R.Z. Mendonca, N.M.F. Gallina and C.A. Pereira (Brazil)
Cytopathic effect induced by rabies virus in McCoy cells 277

D.R. Dahling and B.A. Wright (U.S.A.)
Comparison of fortified calf serum, serum substitutes and fetal calf serum with or without extenders for propagation of cell cultures for virus plaque assays 287

J. Drescher, D. Renger and J. Flik (F.R.G.)
Method for determining the concentration of influenza virus antihemagglutinin antibody molecules, the number of epitopes per virus particle and the equilibrum constant of virus antibody interaction 295

R.J. Isfort, D. Robinson and J.-J. Kung (U.S.A.)
Purification of genomic sized herpesvirus DNA using pulse-field electrophoresis 311

D.L. Krah, T.L. Schofield and P.J. Provost (U.S.A.)
Enhancement of varicella-zoster virus plaquing efficiency with an agarose overlay medium 319

P.E. Klapper, G.M. Cleator, D. Prinja-Wilks, D.J. Morris and G. Morrell (U.K.)
Immunoradiometric assay for cytomegalovirus-specific IgG antibodies: assay development and evaluation in blood transfusion practice 327

G.A. Brown and H.J. Field (U.K.)
A reliable method for establishing viral infection in the rabbit by intranasal inoculation (Short Communication) 341
